Forbrain Headset Wins Prestigious Award at The BETT Show

Judges Hail "Distinctive and Innovative Resource" for Its Unique Method of Overcoming Speech and Language Difficulties

LONDON, UNITED KINGDOM--(Marketwired - Feb 4, 2015) - **Forbrain®**, the groundbreaking headset from Sound For Life Ltd. which is designed to improve speech and auditory processing, has received the prestigious BETT Award for the best ICT Special Educational Needs Solution at The BETT Show, the world's leading showcase of education technology solutions.

BETT Award judges were impressed with the technology and praised the product's unique and non-conventional approach, stating: "*Forbrain is a distinctive and innovative resource that helps the engagement of students in their learning.*"

Not only an effective tool for children with learning difficulties, Forbrain can also be used by anyone wanting to improve their communication skills, attention span and memory. By improving the perception of the voice, Forbrain works simultaneously on all aspects of the audio-vocal loop, sharpening the user's entire auditory system.

Easy to use for people of any age, the engaging headset can be worn for just a few minutes of reading per day, to stimulate the brain and achieve results. The unique device enhances specific patterns of the user's voice, delivering the user's voice directly via bone structure leaving their ears free to perceive external sounds.

Thierry Gaujarengues and Grégoire Tomatis, the co-founders of Sound For Life Ltd., released the following statement: *"We are delighted to receive a BETT Award, which not only justifies the research and hard work we have put into developing this product, but more importantly will help ensure that Forbrain reaches those who need it most."*

Forbrain is available for \$359 per unit at <http://www.forbrain.com/order-now/order-form>
